SUPERIOR BAGS & POUCHES

SHELF LIFE & SHELF APPEAL

what **are you** into?

Food and beverage packaging is highly regulated. So you'll want a partner that's not only qualified but also energized to bring high standards and fresh thinking to the table. It's what we call the "into it™" factor. Perhaps it's our employee-ownership. Or that we've assembled so many diverse packaging services under one, very large—200,000 sq. ft.—roof. Or maybe it's because we like what we do and are good at it. But it sure helps us support all the cool applications that you're into.

Ideas are perishable.

Maco Pkg gives you room to create, experiment and grow—*now*

Maco Pkg has the liquid fill, dry fill and converting capacity to handle whatever you're into.

We live in the solution. Even if there doesn't seem to be one—yet. So bring us your most challenging assignments and let us get into it.

No standard runs. Even on what might be considered a “set” run of flexible packaging—bags and pouches—you can count on your Maco Pkg team to suggest ways to make the most of your investment. Even if it means reconfiguring equipment or building what you need.

We treat yours like it's ours. Thanks to our access to rail lines (they run up to our loading dock) and the size of our facility (200,000 sq. ft.) we can carefully tend to large quantities of dry or liquid materials. What's more, you can supply it, or we'll blend, mix, or acquire it for you.

Certified, naturally. Food and beverage packaging requires certified quality assurances—and we're both organic and kosher. We've worked hard to earn our AIB superior rating and ISO certifications as well.

Remove re-tooling fees from your diet. Our liquid line has two unique fillers so we can stop and go—or change up quickly—without the usual high cost of tooling charges.

Everything from juices to puddings. Pick your viscosity. Your quantity. We'll make it work. We'll even add on-pack containers—for a free-trial promotion or trade show giveaway.

► **Talk to your Maco Pkg rep today, or visit us online at MacoPkg.com.**

Maco Pkg™ offers customers a diverse solution set for custom manufacturing of all types of bags and pouches and the contract packaging of both liquid and dry products. Fueled by an engaged employee ownership, Maco Pkg specializes in enthusiastic and proactive support for all aspects of the packaging process. Maco Pkg is located in Newark, New York where the company operates a modern, 200,000 sq. ft. facility.

SAMPLES/MARKET TESTING

what **are you** into?

With materials as varied as lotions, gels, fragrances and fine powders, the Health and Beauty category presents a wide range of packaging opportunities. Ways to make the process more efficient, sustainable, organic — or just on-shelf gorgeous. So you need a partner who is not only rigorous in their attention to detail, but also enthusiastic enough to go beyond the expected. It's what we call the "into it™" factor. Perhaps it's because we're employee owned. Or that we've assembled so many diverse packaging services under one, very large—200,000 sq. ft.—roof. But it sure makes it easier to support the things you're into.

Packaging is flexible.

It's our standards that are rigid

Maco Pkg has the liquid fill, dry fill and converting capacity to handle whatever you're into.

Want to look good? We have a regimen that will make your next packaging assignment much less stressful. It starts with living in the solution—even if there doesn't seem to be one, yet. So on a standard run of flexible packaging—bags or pouches—you can count on your Maco Pkg team to suggest ways to make the most of your investment. Even if it means reconfiguring equipment, or building what you need from the ground up.

We treat yours like it's ours. Thanks to our access to rail lines (they run up to our loading dock) and the size of our facility (200,000 sq. ft.) we can carefully tend to large quantities of dry or liquid materials. What's more, you can supply it, or we'll blend, mix, or acquire it for you.

Healthy. Vibrant. Certified. Your packaging requires certified quality assurances. We've worked hard to earn ISO, organic and kosher certifications (among others)—and our continuous improvement strategies push us to always-higher levels of quality control.

Stretchhhhhh that budget. Our wet line has two unique fillers so we can stop and go—or change up quickly—increasing speed to market and eliminating the need for expensive re-tooling and set-up charges. That makes lean startup resources go much further.

From fragrance to gel. Pick your viscosity. Your quantity. We'll make it work. We'll even add promotional samples—for a free trial or trade show giveaway.
