- Valve pouches

Maco Pkg[™] offers customers a diverse solution set for custom manufacturing of all types of bags and pouches and the contract packaging of both liquid and dry products. Fueled by an engaged employee ownership, Maco Pkg specializes in enthusiastic and proactive support for all aspects of the packaging process. Maco Pkg is located in Newark, New York where the company operates a modern, 200,000 sq. ft. facility.

Startup dollars last longer at Maco Pkg.

Our liquid line has two unique fillers so we can stop and go—or change up quickly—without a multi-thousand dollar re-tooling charge. That can really stretch a contract-packaging budget.

"Custom" doesn't really define our approach.

Even on a standard run of flexible packaging—bags and pouches—you can count on your Maco Pkg team to suggest ways to make the most of your investment. Even if it means reconfiguring equipment, or building what you need. Want a sample? Just ask.

Standards as high as we can set them.

We have strict quality control mandates for every job. And in cases where your process requires certified quality assurance, here are some our current qualifications:

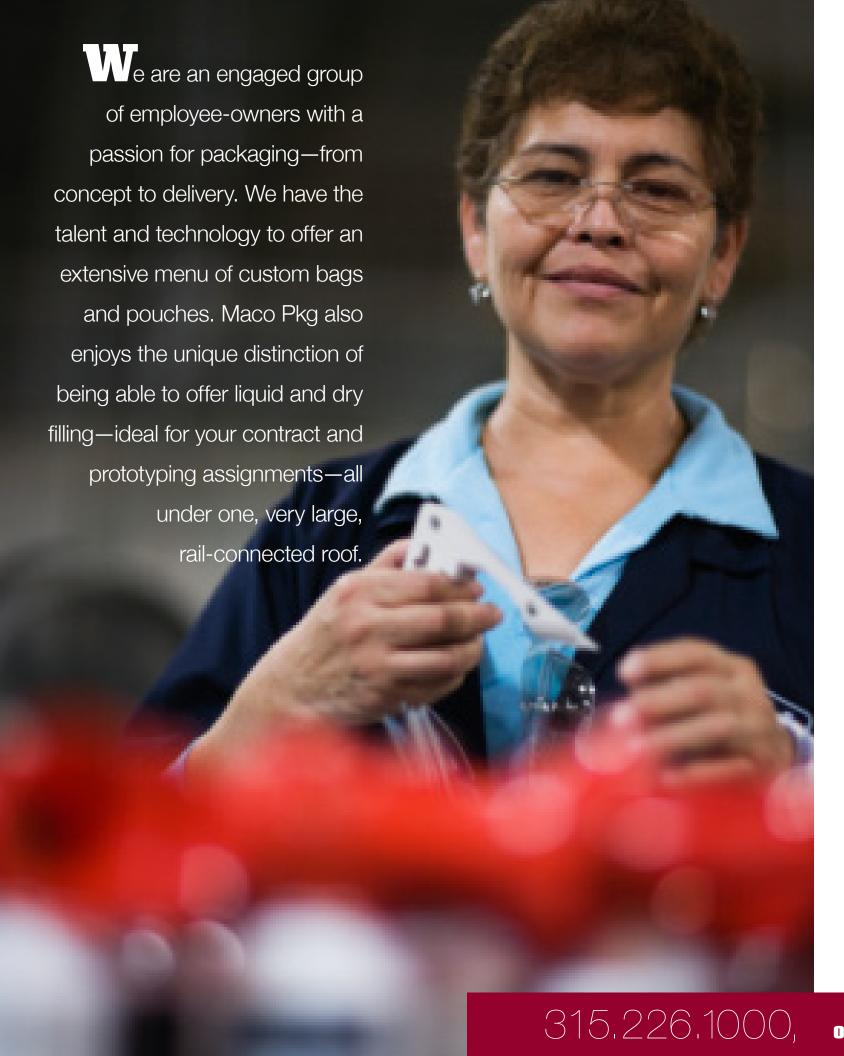

ISO 9001: 2008 | FDA | Kosher | Organic American Institute of Baking (AIB).

Inventory management? More like inventory pampering.

Thanks to our access to rail lines (they run up to our loading dock) and the size of our facility (200,000 square feet) we can carefully tend to large quantities of dry or liquid materials. What's more, you can supply it, or we'll blend, mix, or acquire it for you.

Liquid filling, dry filling, idea generation, first-time applications, rejuvenated shelf appeal—no matter what you're into, Maco Pkg will tackle it with energy, insight and experience.
